

About CRM systems for lead ads

You can use a variety of CRM systems to generate leads through your lead ad campaigns. A CRM system with Meta Business Suite lets you see all your leads in one place. You won't need to wait for a long time to see your new leads.

The different types of CRM systems include:

- **Direct integration:** Directly connects your CRM system with Meta Business Suite.
- **Third-party integration:** Uses third-party tools, such as Zapier and LeadsBridge, to connect your CRM system with Meta Business Suite. This option is ideal as it provides you with an easy onboarding with no coding required.
- **Custom integration:** You can create your own tool to upload your leads with the Webhooks and Graph API.

If you prefer not to connect a CRM system yourself, you can reach out to a Meta Business Partner for help. These partners build technology solutions that can help you scale and optimize your Meta ad campaigns. They can help you develop creative, build audiences, connect CRM systems, set budgets, create reports and more.

Integrating your CRM system with Meta has many benefits but it's not required. You can still download the leads data you collect across Meta technologies from Ads Manager or Meta Business Suite when you don't have a CRM integration.

Womens Ad Set

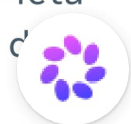

You could get more results by increasing the budget of 1 ad set

Your cost per result has been increasing compared to your baseline. Adopting this recommendation could help reduce costs and improve campaign efficiency.
